LB 124

should have done that last year instead of totally just eliminating and at least allow those people who were, who made the commitments to use alternative energy sources to continue with their property tax exemptions and not allow any new people in the field. With that in mind, I think it's a reasonable amendment and I will support it.

PRESIDENT: Chair recognizes Senator Pirsch.

SENATOR PIRSCH: Thank you, Mr. President and I'm glad Senator Newell is supporting this after his questions. I also support this amendment and feel that the commitment made by the Legislature should be followed through and I believe that it was unintentional and overlooked that it was eliminated in the first place, so, therefore, by adopting this amendment we will be following through on what was promised to these people who made that commitment to go to alternative forms of energy back when we were really, really trying to find an alternative to those increasing shortages of other, of other fuels. So I think we ought to keep faith with those people and put on this amendment. Thank you.

PRESIDENT: Is there further discussion on the Kil...Senator Carsten.

SENATOR CARSTEN: Mr. President and members of the Legislature, I guess that a flag runs up in my mind right now and the flag is this that sometime back when we were dealing with the greenbelt bill and Senator Warner had and these exemptions and those that had been deleted, this comes somewhat parallel to that, that same question. And I'm wondering about the, I guess I only raise it questioningly, questioningly about the constitutionality. Do you want to reply to that and have you checked on this? I really don't know but it just rings a bell that it's so parallel to what Senator Warner was having problems with, with that greenbelt bill.

SENATOR KILGARIN: Senator Carsten, excuse me, Mr. President, Senator Carsten, in trying to respond to your question, I'm going to have to say that I really don't know that it will raise constitutional questions. I think that the Bill Drafter was very careful in his drafting of it and I'm hoping that it won't. It only affects like under five people but it's just one of those things being fair to those people.

SENATOR CARSTEN: I understand the minimal impact but I, it just rang a bell that we were so parallel to, to what Senator Warner was doing with that greenbelt bill that I just, I just raised the question for information. Thank you.

PRESIDENT: Motion is the adoption of the Kilgarin amendment. All those in favor, vote aye, opposed, vote no. We're voting
